NEW Trial Alert - CYTOSHRINK

There is a new cutting-edge trial that we would like to highlight!

The trial is called "CYTOSHRINK" - a multi-centre, open label, phase II randomized clinical trial evaluating SBRT as upfront cytoreductive therapy to the primary renal mass along with combination I/N therapy in patients with intermediate/poor risk mRCC who are not candidates for upfront cytoreductive nephrectomy. Note: a downstream nephrectomy is an option for your patients within the trial.

Details are available on ClinicalTrials.gov <https://clinicaltrials.gov/ct2/show/NCT04090710>

If any sites are interested in participating or would like more information, the study team would be happy to hear from you - please contact: lalania@hhsc.ca

There are currently sites in Ontario (Juravinski Cancer Centre, Grand River Regional Cancer Centre, The Ottawa Regional Cancer Centre, Sunnybrook Health Sciences Centre- Odette Cancer Centre), Alberta (Cross Cancer Institute), and Quebec (McGill - to be opened). Please consider referring your patients!
