Kidney Cancer Health Care Survey

Dear healthcare professionals working with kidney cancer patients,

I am an assistant professor at the University of Toronto in the Faculty of Kinesiology and Physical Education in the area of exercise and cancer survivorship.

We are assessing kidney cancer healthcare providers' physical activity attitudes and counselling practices. The goal of this research is to understand how we can best increase physical activity knowledge and counselling in healthcare professionals working with kidney cancer survivors.

If you could follow this link to participate in this short survey (5-10 minutes), that would be greatly appreciated. <https://redcap.utoronto.ca/surveys/?s=PNCFDHLXFL>

If there are other healthcare professionals working with kidney cancer patients, please feel free to forward this e-mail to them.

Thank you for your time and consideration.

[Dr. Linda Trinh](#)
